

## Europa (Earth's Cry Heaven's Smile)

### *Tone Settings*

These are the tone settings I used in my Europa guitar lesson videos. I used a guitar with hot humbuckers. These settings are just meant to be a good starting point for you and will need to be tweaked for your guitar. Also, I was just going for a nice sound that worked for playing "Europa" with its long sustaining notes, not one that exactly matched the original recording. I used a Line 6 POD HD500X to put these setting together.

The settings below are for the high gain lead sound. For the clean sound, the setup is pretty simple. Just use a clean setting on the amp into a chorus pedal with a mix setting that is pretty high, followed by a nice hall reverb.

Compressor = Line 6 Vetta Comp: Sensitivity 57% - Level 73%

Noise Gate: Decay 50% - Threshold 50%

Wah = Arbiter Cry Baby

Amp = '09 Engl® Fireball 100: Drive 77% - Bass 82% - Mid 62% -  
Treble 86% - Presence 75%

Cab = \$X12 with Vintage Celestion 30's

Digital Delay: Time 420ms - Feedback 58% - Bass 50% - Treble 50% -  
Mix 45%

Reverb = Cave: Decay 67% - PreDelay 178ms - Tone 80% - Mix 21%
